

Lesson 4: Art

Wax Painting

MATERIALS:

- - **White/light colour Candle/crayon**
- - **Acrylic Paint**
- - **Water**
- - **Paper**

TOOLS:

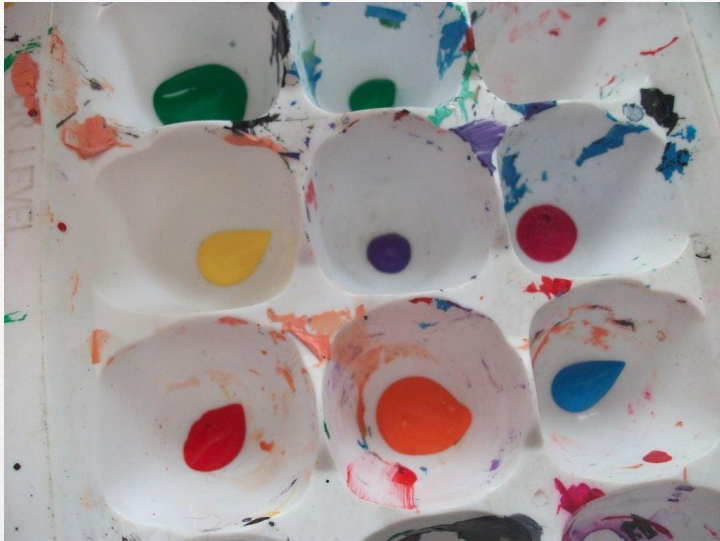

- - **A brush**

Step 1: Draw

Take a paper and draw what you want on it with the candle. It's a little bit difficult to see what you are drawing... so it's better to know beforehand what do you want to draw. Also remember that you can't erase...

Step 2: Colour Preparation

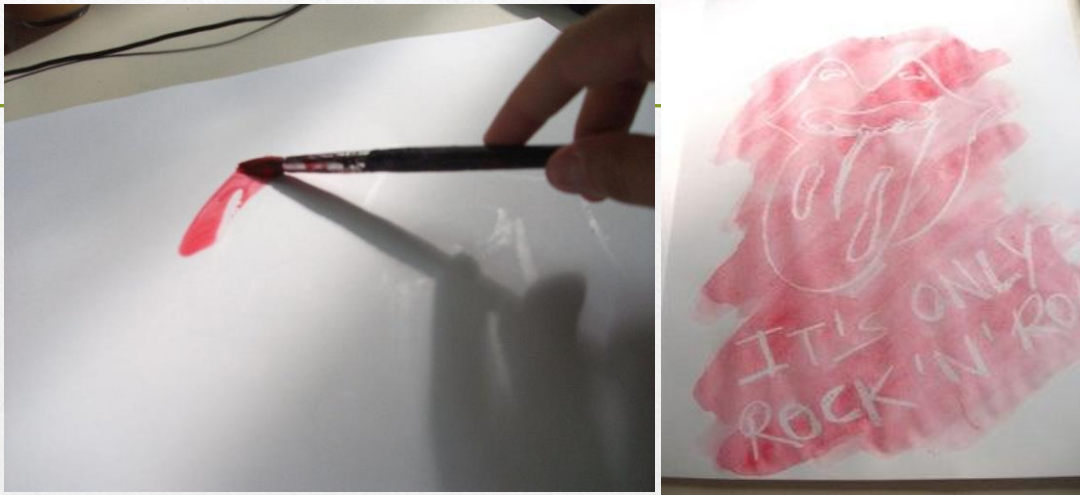

Now you need to prepare the colours. In a palette put a little drop of paint. Then, add some water to dilute the paint.

This is very important: wax is a natural water repellent. If you put too much paint it won't work.

Don't add too much paint!

Step 3: Paint

Paint all over your paper to reveal your wax drawing.

Step 3: Paint
