

Please go through the slides. In the slides you will see a map of Spring Town. The residents of Spring Town are not happy. Can you redesign Spring Town for the residents to make them happy? You can add the symbols on the given map of Spring Town and rearrange them to make the residents happy. Or you can make a complete new map with all the key features on paper and upload it.

Add the symbols to the map to build your new town.

Where should the school to go?
Where could you build houses?
Will people want to live close to a rubbish dump?
