

Different types of Forces

BY TANAY RAJPUT
3GG

There are different types of forces used in everyday life.

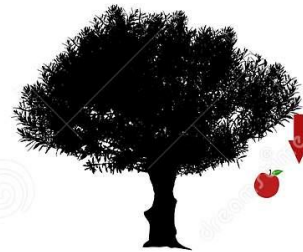

TYPES OF FORCES

APPLIED FORCE

FRICTIONAL FORCE

GRAVITATIONAL FORCE

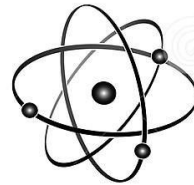

DRAG FORCE

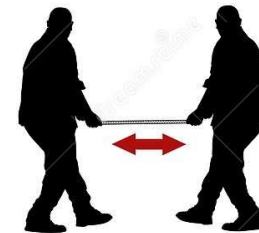

SPRING FORCE

MAGNETIC FORCE

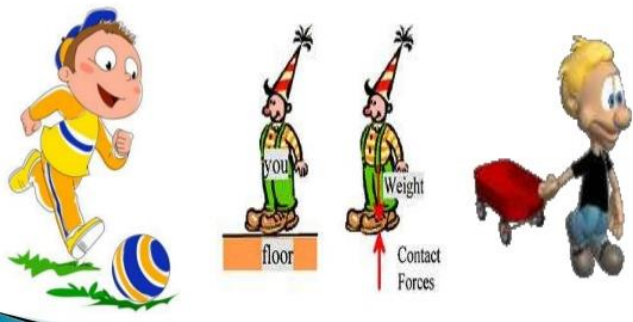

ELECTRIC FORCE

TENSION FORCE

What are the 2 major types of forces these are: Contact Forces and Field forces.

Contact Forces involve physical contact between objects. Examples: the force involved in kicking a ball, pulling a wagon, compressing a spring, etc. This is a pull and push type.

Field forces don't involve physical contact between objects. Examples: the gravitational force and the electromagnetic force
