

Today your task is to design a new home for the crayons. Here is a picture of the new home that Duncan built for the crayons.

The crayon box that the crayons live in, in Year 2 has gotten damaged and the crayons need a new home. You need to first design this home on paper. Remember to show rooms for places for each crayon so every crayon is happy. What does each crayon need / want in their new home? Design the house on paper and upload a picture on Google Classroom. Then if you are feeling adventurous, you can make a 3D home for the crayons. For this you will need some resources like tape, glue, card, scissors, paper and cardboard boxes. Please make a 3D model only under adult supervision.

Thanks
