

Maths Mastery Home Learning Challenge

Adult Guidance

What Are We Learning?

We are learning to find one less and predict how many will be left.

How to Set up the Challenge

- Collect together five soft toys and sit them in a line behind a seat (this will be the bus driver's seat).

How to Get Your Child Thinking

- How many toys are on your bus?
- When the bus stops, one toy will hop off the bus. Can you take one toy off the bus?
- How many toys are there now?
- If one more hops off, how many do you think there will be left?

Hop off the Bus!

- There are five toys on your bus. Each time the bus stops, one hops off the bus.
- How many toys are there now one has got off?
- How many will there be if one more gets off?
