BioStore
Identity Management

Avanti House Secondary School operates a student recognition system using biometrics for cashless catering and in the future may use it for library management, print and copy cost control, access control and registration.

Background to the use of biometrics in school

Biometric information is information about someone's physical or behavioural characteristics that can be used to identify them. As part of our identity management systems, we will record a biometric measurement taken from a finger, but not a fingerprint image. This information is stored in a highly secure database and will only be used by the school to confirm who is using a range of services.

The school will not use the biometric information for any purpose other than that stated above. The school will store the biometric information collected securely in compliance with the General Data Protection Regulation (GDPR), the Data Protection Act 2018 and all relevant laws concerning the protection of personal data.

The school will not share this information with anyone else and will not unlawfully disclose it to any other person.

Once your child ceases to use the biometric recognition system when they leave, their biometric information will be securely and permanently deleted by the school.

I understand that I can withdraw this consent at any time in writing.
