

Sustainable Goals - Focus Days

These goals have been agreed between the members of the United Nations and are briefly listed below.

They are a call for action, for all nations, to promote prosperity whilst protecting the planet. The ambitious aim for these goals is that they are largely met by 2030. Each half term, the school spends an afternoon focussing on one of the goals. This aims to give the children a sense of what being a global citizen means and give them a snapshot of how life is different for other children across the world. This term we have looked at 'Health and Well-being'; hugely important given the current struggles against the pandemic and the fallout in terms of mental health issues. All year groups explored healthy eating and looking at what a person needs to be healthy. We all ended the afternoon with a yoga activity linked to mindfulness. Our next goals will include Peace, Justice and Strong Institutions where we will look at the importance of rules and fairness in society.

For more information, please see <https://sdgs.un.org/goals>

We had a visit from Mojo Moves as part of a day learning more about sustainable travel.

Sustainable Development Days give us opportunities to work together to find out more about world problems and what we can do to help to solve them.
