

Focus on... Computing

#5

Internet Safety...

A **digital footprint** is a trail of data you create while using the Internet. It includes the websites you visit, emails you send, and information you submit to online services. A "passive **digital footprint**" is a data trail you unintentionally leave online. Always use devices with integrity!

Did you know...

The first electronic computer ENIAC weighed more than 27 tons and took up 167 square metres! Imagine trying to get 30 ENIACs from the computer room to your classroom - WOW!

Go explore...

Some would argue that the first computer was the abacus or its descendant, the slide rule, invented by William Oughtred in 1622.

But who invented the first computer that resembles what we use in schools today?

Picture this...

Can you name this silhouette of a character?
