

Focus on... Science

#68

On this day...

in 1903, John Heysham Gibbon was born. The American surgeon invented the heart-lung machine. By 6 May 1953, he was able to perform the first successful open-heart operation.

Did you know...

You can't taste food without saliva.

Go explore...

What is absolute zero?

Picture this...

A fish explores a bleached sea anemone in the Red Sea. Anemones form symbiotic relationships with algae that are disrupted when oceans get too warm, causing the anemone to expel the algae and become colourless.
