

# Focus on... Design Technology

#197

## On this day...

in 1878, the world's first moving pictures were caught on camera. 12 cameras were used, each taking 1 picture, to see if all 4 of a horse's hooves leave the ground.

## Did you know...

Carrots were originally purple. Originally, these vegetables were purple or white with a thin root. The orange carrots we know and eat today are actually the result of a genetic mutation in the late 16th century that won out over the original colour.

## Go explore...

Who are the FSA (Food Standards Agency) and what does their job involve?

## Picture this...

The largest tomato weighed 4.896kg according to the Guinness Book of World Records. What can you find that is a similar weight?
