

Focus on... Mathematics

#243

On this day...

In 1867, Wilhelm Kutta, a German engineer was born . He is best known for his work on the numerical solution of differential equations (the Runge-Kutta method).

Did you know...

You probably never thought about this before, but there is only one number spelled with the same number of letters as itself. Can you guess which one? No? Well, It's 4.

Go explore...

Can any shape with straight sides be made by folding a single piece of paper and by making a single complete cut?

Picture this...

An average bathtub holds **80 gallons of water**, while an Olympic-sized swimming pool has **660,253 gallons of water**.

Can you figure out how many bathtubs of water it would take to fill a swimming pool?
