# Focus on... Computing

#285

On this day...

we celebrate British Science Week. To kick-start the week listen to the Smart Bots (encore) podcast where you can learn about the different forms of Artificial intelligence surrounding us. <u>Click here</u> to listen.

Did you know...

Artificial intelligence is the ability of a computer program or machine to think and learn. It is another term for 'smart' computers and is also known to mimic human perception.
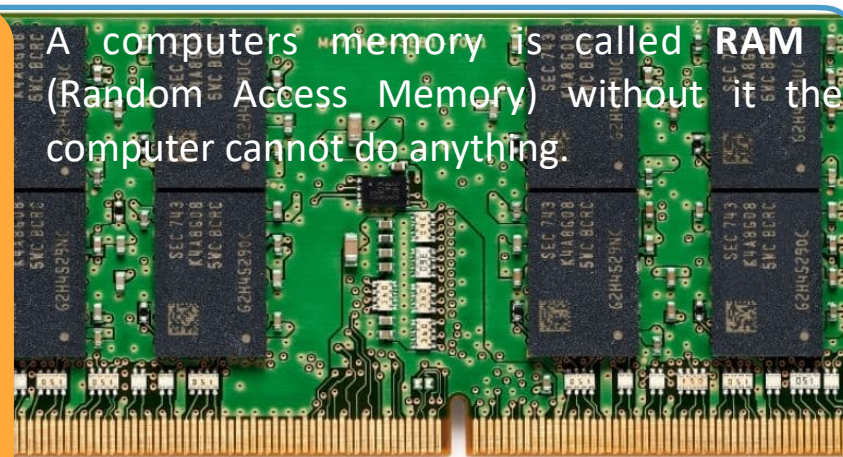

Go explore...

Unplugged Coding with a Deck of Cards. Create a grid by laying down the cards face down; add toys as obstacles; guide a 'robot toy' from start to finish whilst avoiding the obstacles. <u>Click here to learn more.</u>

Picture this...

A computers memory is called **RAM** (Random Access Memory) without it the computer cannot do anything.
