

## Focus on... Queen Elizabeth II

#304

### Did you know...

Did you know that Queen Elizabeth II was never actually expected to become Queen? Her uncle was expected to become King and produce an heir, but he chose to abdicate (give up the throne). This made Elizabeth's father King, making her heir to the throne when her father died.

### Did you know...

Did you know that in the past the crown always passed to the eldest male child, even if they had an older sister? In 2013 the Queen changed this by passing the Succession to the Crown Act, meaning that now the eldest child will be next in line to the throne, even if they are female.
