Pre-school

Summer term 2 : Summer and the Seaside

Big Question: How big is the Sun?

Key texts:

Physical Development

We want all our children to develop their gross and fine motor skills. Practising bouncing a ball to each other, building a cushion tower and going on the swings at the park are examples of building core gross motor strength.

Strengthening fine motor skills is fun! At home, you could use scissors to cut shapes, paint with a cotton bud and thread cheerio's on to a pipe cleaner.

Please continue to practise name writing using the RWI formations. Alternating the media used to do this keeps it interesting and fun! You could try painting letters with a finger or writing with chalk on the pavement.

Other home learning ideas

Can your child scoop out their own ice-cream into a tub or cone?

Could you make some playdough following a recipe and bring it into School to share with friends?

Home learning project

Can you make a seaside, under the sea habitat or park scene using different materials and media? You could use junk modelling, collaging, drawing or painting.

Reading

This term, our readers programme will launch for all children. Please read every week with your child and fill in the reading log after each session. Ask your child to tell you the story by describing what they see. If your child has 'green words' from their phonics class, please continue to read these weekly.

Red words

Red words are words that you cannot sound out. Help your child to recognise these words. Remember, do not sound them out just say them!

the, I, to, go, no

PSED

In circle time and throughout the day, we will continue to embed our core values displayed here in orange:

Key dates for this half - term

4th July 5 – 6pm : Pre-school graduation

17th July – End of term

Remember to go onto our school website for key calendar dates. Remember to log on to your child's Espresso account to access their learning pad and a wealth of learning resources.
