

Year Five Homework – 8/11/19

Science

Could you write a scientific evaluation about what we found out when we tested our paper boats; use the following key words: force, water resistance, surface area, friction, balance. If you want this report to go on the website, please provide it as a word document.

Maths

Pick either challenge one, two, or three and answer the questions provided. If you want to extend yourself, use the internet to plan a journey from Watford Junction to Cardiff and then back via Oxford. What trains will you get and how long will it take?

Spelling

This week's rule is silent letters at the start of words: 'k' before 'n', 'g' before 'n', 'w' before 'r', and 'p' before 's'. Please find words that follow this rule when reading this week.

Big Write

We have begun to look at suspense stories and the literary techniques that they use. In preparation for our big write, make notes of different literary devices from your reading books and write a short setting description for a suspense story.

Stem Fair

With Avanti House Secondary, Year Five are taking part in the STEM fair; for more information visit: bit.ly/stemfair2020 and fill in the survey provided.
