

Dear Avanti House Pupils,

We would like you ALL to create a storyboard that could potentially be turned into a 2 minute film! We are taking part in the harrow film festival this year and each key stage will be represented by a group of children who will act, film and edit a 2 minute film to be submitted to the competition. We are really excited for you to take part. To ensure you all have an input, we would like you as part of your homework this week to sketch/plan a story on the theme of 'Change'. Attached is an example of how you would layout the storyboard. Add the scene in images in the big boxes and captions for what is happening in each scene in the smaller boxes.

Change

When you hear the word 'change', what does it conjure up for you? Is it the change to the global climate and the melting ice caps or is it the importance of recycling? You may be thinking of the changes of the seasons as autumn turns into spring, whilst others will be thinking of baking, where the raw ingredients once put in an oven change into a yummy cake! Animators may be thinking of changing the shape of plasticine to create a moving figure and budding scientists may be thinking of the chemical changes of an exciting experiment! Whatever it may be, really engage with your idea. Think it through and ensure there is a clear element of change. Feel free to make it link to your subjects in school or just something personal/important for you. Older children may want to relate it to current affairs in the world/UK.
