Science Selfie

To start our Science week with a bang we are running a whole school homework project. Your task is to take a #ScienceSelfie, a photo showing you taking part in some aspect of science. Then print out the photo, attach to the sheet and explain underneath what aspect of Science your Selfie shows.

You can choose any aspect of science that interests you. If you are stuck some ideas are:

- Mixing solids in different liquids
- Design and make a parachute
- Floating and sinking (you could try an orange with peel/ without peel)
- Create your own wormery
- Plant a seed
- Make a bug hotel
- Make a recycled bird feeder
- Make invisible ink

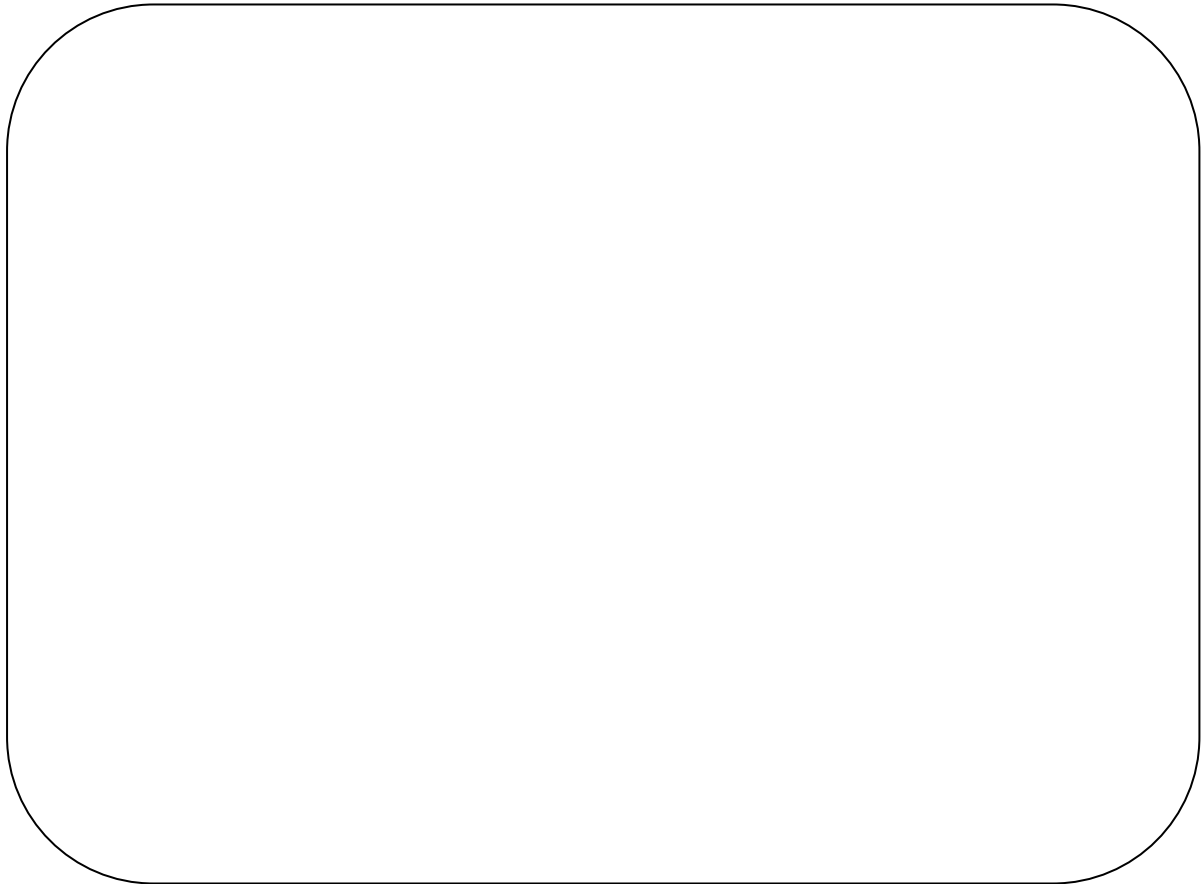

Also <http://www.sciencekids.co.nz/experiments.html> has some interesting ideas.

Please return to school by 16th March. Thank you.

Name _____

#ScienceSelfie

Take your Science Selfie, print the picture and stick in the frame below.

Now explain what aspect of Science your Selfie shows.

A scroll-like frame with a vertical strip on the left and a large rectangular area on the right, intended for a written explanation.
