English - Grammar and Punctuation

Intent

At Krishna Avanti Primary School we believe in a holistic approach to the teaching of English, with grammar and punctuation embedded within the teaching of writing and reading.

Implementation

Grammar and punctuation knowledge and skills are taught in both English and across the curriculum. The relevant areas of grammar are specified for each text covered and woven into the teaching sequence for writing/learning journey. There are also opportunities for grammar and punctuation to be taught explicitly.

Teachers model high-level talk, using standard English and use the core texts to show how authors use grammar and punctuation to achieve particular effects. The No Nonsense Spelling Scheme is used as an intervention for children needing extra support.

Impact

We aim to nurture confident writers, who show conscious control over the grammar and punctuation that they use, with a clear understanding of purpose and audience.
